

NORTHWOOD MIDDLE SCHOOL

7th Grade Curriculum Guide 2022-2023

Northwood Middle School 12908 N Pittsburg
Spokane, WA 99208
509-465-7500

Mead School District, 2323 E Farwell Rd, Mead, WA 99021

7th Grade Courses

Seventh grade required courses

| | |
|--|--------------------|
| Math (students will be placed in the appropriate math course) | 2 Semesters |
| English (see course descriptions for options) | 2 Semesters |
| Social Studies | 2 Semesters |
| Science | 2 Semesters |
| Physical Education | 2 Semesters |

Seventh grade elective courses (students choose one of the following)

| | |
|------------------|------------------------|
| Band | Year-Long Class |
| Choir | Year-Long Class |
| Orchestra | Year-Long Class |

Students choose from the following

| | |
|---|-------------------|
| Beginning Design & Modeling | 1 Semester |
| Beginning Automation Robotics | 1 Semester |
| Beginning Game and App Design | 1 Semester |
| Beginning Art | 1 Semester |
| Leadership 7 | 1 Semester |
| Crime Scene Investigation (CSI) | 1 Semester |
| Yearbook (limited space/teacher signoff) | 1 Semester |

7th Grade Course Descriptions

REQUIRED COURSES

ENGLISH

English 7 The seventh grade English course focuses on reading, writing, speaking and listening and research skills that are all taught and reinforced through our core curriculum program called *Collections*. Students read a variety of classic and contemporary novels along with nonfiction essays, speeches and articles. Reading comprehension and vocabulary study are foundational in all English classes. Writing is taught throughout the core curriculum and focuses on the three modes: narrative, information and argument. Students learn structure, organization, word choice, idea development and conventions as they deepen their understanding about how to communicate through writing.

(Note: A student with an IEP in Reading/Writing will be scheduled appropriately in a Resource English class.)

Honors English 7 This course uses the same core curriculum program, *Collections*, as English 7 but the activities take students deeper into the content. Students will also read more complex texts that may be above grade level. This course is designed to offer an enriched and challenging sequence of study for students who may be advanced in reading and writing. This is an advanced course that is open to all students; however, students should thoughtfully consider enrollment in an honors course.

MATHEMATICS

Math 7 Students will further develop their understanding of rates and ratios, using tables, graphs, and equations to solve real-world problems involving proportional relationships. Students will also work on quickly and accurately solving multi-step problems involving positive and negative rational numbers—any number that can be made by dividing one integer by another, such as $\frac{1}{2}$, 0.75, or 2. Additionally, students will expand their knowledge of geometry and apply the properties of operations to solve real world problems involving the measurement of multi-dimensional objects.

(Note: A student with an IEP in Math will be scheduled appropriately in a Resource Math class.)

Advanced Math 7 Students take their understanding of unit rates and proportional relationships to a new level, connecting these concepts to points on a line and ultimately using them to solve linear equations that require them to apply algebraic reasoning as well as knowledge of the properties of operations. Students will also expand their understanding of numbers beyond rational numbers. Students will be evaluated for placement in this class.

Algebra I Algebra I is foundational for all future math courses. Students explore algebraic problem-solving for linear, exponential and quadratic functions as represented in context or as a graph, equation and table. Areas of study include arithmetic and geometric sequences; linear systems and inequalities, polynomials and factoring; and modeling and statistics. This course is consistent with Washington State Standards. *A student earning a passing grade in this course will receive high school credit, which shall be applied to fulfilling high school graduation requirements, unless requested otherwise by the student and the student's parent or guardian by the end of the 11th grade year. (WAC 180-51-030)*

PHYSICAL EDUCATION

Health and Fitness Education This course emphasizes team and individual sports, lifetime activities, and health and fitness concepts. Students will participate in a wide variety of activities, as well as gain an understanding of how to plan their own lifelong health and fitness.

SCIENCE

Science 7 Have you ever wanted to learn more about the science of life...all life? In 7th Grade Science, a CTE project-based STEM class, you will explore cell structure, genetics, evolution, characteristics of living things, ecological relationships and human body systems through team-based problem solving which will allow you to interact, create and develop solutions to real world problems and current issues. You will also become a physician in our middle school medical school, investigating diseases, developing treatment plans, assessing patient profiles and genetic disorders and exploring the relationship between cells, tissues, organs, and systems and their impact on healthcare. You will further investigate the connections with industry, research on ecosystems and the future of biomedical science.

SOCIAL STUDIES

Social Studies 7 (Pacific Northwest History) Seventh graders explore Washington state, from native and European contact to the present. They examine the state constitution and key treaties, including local and popular tribal sovereignty issues. Understanding of civics, economics, geography and history are developed while learning about differing cultural experiences as well as interactions between humans and the environment. This course fulfills a Washington State graduation requirement.

CONTINUING MUSIC ELECTIVES (year-long courses)

Beginning Band Beginning Band is for the student who has little or no band experience. There will be performances during the school year. Students will be graded on performance, preparation, participation in class and attendance at additional rehearsals and events. Students are responsible for providing their own instruments. The band instructor will guide this process during the first week of school. Students will be placed in the appropriate band.

Cadet Band This course is for students with band experience. Along with music fundamentals at the individual level, students will learn group techniques in an advanced band setting. This band has a number of performances during the school year. Students will be graded on performance, preparation, participation in class and attendance at additional rehearsals and events. Students will be placed in the appropriate band.

Symphonic Band This course is for advanced students with band experience. Along with music fundamentals at the individual level, students will learn group techniques in an advanced band setting. This band has a number of performances during the school year. Students will be graded on performance, preparation, participation in class and attendance at additional rehearsals and events. Students will be placed in the appropriate band.

Jazz Ensemble I Jazz I is an elective class for the most advanced students who have auditioned and been selected as members of the ensemble. Students in Jazz I are required to also have a concert band as their elective unless their instrument is piano or bass. The curriculum consists of advanced jazz techniques such as ensemble playing, style, feel, jazz theory and improvisation. This band has a number of performances throughout the year.

Jazz Ensemble II Jazz II is a “zero hour” class for students who have auditioned and been selected as members of the ensemble. Students in Jazz II are required to have a concert band as their elective unless their instrument is piano or bass. The curriculum consists of developing jazz techniques such as ensemble playing, style, feel and improvisation. This band has a number of performances throughout the year. Jazz II rehearses Mondays and Thursdays from 7:00am to 8:00am. Auditions are held at the beginning of the year.

Concert Choir For all voices - sixth, seventh and eighth grade - no audition required. Students will learn and improve vocal skills by performing literature from many genres including American, sacred, jazz and contemporary. Students will perform in night concerts and travel to festivals. Students are graded on participation in class, skills-evaluations, and required performances as outlined in the Choral Handbook. This is not an audition-based choir. Required fees include ASB and uniform purchase.

Treble Choir For Soprano, Mezzo Soprano and Alto voices, advanced singers in mostly seventh and eighth grade, by audition. Students will learn and improve vocal skills by performing challenging literature from many genres. Students will perform in night concerts and travel to festivals. Students are graded on participation in class, skills-evaluations, and required performances as outlined in the Choral Handbook. Required fees include ASB and uniform purchase. This is an audition-based choir and will be a year-long (two semester) commitment.

Jazz Choir For all voices including Soprano, Alto, Tenor and Baritone, mostly eighth grade advanced singers by audition only. Students will learn and improve classical and jazz vocal skills in particular, performing challenging literature from many genres including chamber and jazz music. Students are graded on participation in class, skills-evaluations, and required performances as outlined in the Choral Handbook. Required fees include ASB and uniform purchase. This is an audition-based choir and will be a year-long (two semester) commitment.

Beginning Orchestra This course is for 6th or 7th grade students with Little or No Orchestra experience and a desire to explore the joy of making music with others. Instruments and materials will be provided for students, but you are welcome to get your own as well (please contact me before buying so I can support this process). Students will learn body position, music reading, and music performing ensemble skills. There will be a few concerts during the year. Grading is based on daily participation, preparation, and performance attendance.

Advanced Orchestra This orchestra course is designed for the 6th, 7th, or 8th grade advanced strings student with one or more years of playing experience, foundational posture, and music reading skills in place. Students will refine fundamental skills while exploring new techniques and playing more advanced music. There will be a few concerts during the year. Grading is based on daily participation, preparation, and performance attendance. Student placement in this ensemble will be made by the teacher and based on demonstrated playing skills.

ELECTIVE COURSES (Semester Long)

Potential offerings. Every effort will be made to offer your selections.

Beginning Design and Modeling Do you like to draw, design and use software to create 3 dimensional spaces? Students will be introduced to Google SketchUp, design software and its application in the design process. Students will problem-solve real world issues and build prototypes of their designs. STEM (Science/Technology/Engineering/Math) career and educational opportunities will also be presented and explored.

Beginning Automation-Robotics Students trace the history, development and influence of automation and robotics as they learn about mechanical systems, energy transfer, machine automation and computer control systems. Focus is on the building and limited programming of robots.

Beginning Game and App Design An introductory class to block coding and logical reasoning where students build games, animations, and mobile apps using block based programming languages. Students learn the basics of how to code, what they can do with code, and where it can take them later in life.

Beginning Art Students will be introduced to the vocabulary of art (the elements, principles, materials and skills) and begin to apply that knowledge in creating projects. Creative problem solving will be introduced in some lessons and the purpose of art making will be explored. Explaining art work and preparing artwork for display are also included. Students may experience drawing, painting, mixed media art, sculpture, ceramics and other areas of visual art. Students wishing to take advanced art must complete a semester of beginning art first. There is a \$20.00 supply fee per class (semester).

Leadership 7 The goal of this elective class is to educate and cultivate the next generation of leaders who have a strong sense of self-awareness, have the ability to work effectively with others and who develop into servant leaders that impact their communities for the better. Students will have the opportunity to practice leadership skills as they serve Northwood and the greater Spokane community

Crime Scene Investigation (CSI): Crime Scene Investigation is a stand alone course that helps students to understand how crime scenes are processed, and evidence is collected. We will focus on the crime scene basics, identifying and matching fingerprints, DNA analysis, blood spatter analysis, manner and cause of death, as well as ballistics and tool marks identification.

SUPPORT COURSES

Reading Enrichment This course uses Read 180 and focuses on reading comprehension and vocabulary. Students learn different reading strategies each week that can immediately be implemented in their core classes to help build reading comprehension. Weekly attention is also given to reading fluency and reading rate, as necessary. However, the focus is on reading strategies and vocabulary development to improve understanding of all different types of texts. Students will be assigned to this class based on data..

Math Strategies Math is hard, confusing, and a unique journey for each of us. If you are placed in this class you will learn strategies to help with math, you will have help with your homework for math, and hopefully, you will enjoy the journey of learning math. The goal is growth, not perfection. Students will be assigned to this class based on data.

SPECIAL SERVICES PROGRAMS

Students must be qualified through the Mead School District's Special Services Department. Each student's Individual Education Plan (IEP) services will be determined on a case by case basis. A continuum of services will be provided for each individual student's needs.

Resource Room The purpose of the Resource Room is to provide a specially designed curriculum and individual instruction in the basic skills of reading, written expression, mathematics, and other areas as determined by the IEP team.

Life Skills The course goal is to teach the functional skills that a student needs to become a productive and independent family member, citizen, employee, and a participant in a variety of vocational and leisure time activities. Consequently, they will be taught to develop healthy self-concepts, attitudes, and behaviors necessary to become productive citizens.

Developmental Learning Center This is a Mead School District program for middle school students who qualify for special education services and who have an Individualized Educational Program (IEP). The curriculum is highly individualized and based on each student's IEP. The program focus is on functional academics, communication skills, and the development of social and adaptive skills. This is a non-graded program for middle school students.
